MUSIC TINDER

AUTHOR: AMJAD OMER, DANIEL NGUYEN, LIAM OLSON, NATHAN RUSSELL, ROSE SATRIANO

Problem Statement

Finding new music that you enjoy easily has become too much of a hassle and includes too many oversaturated songs and styles. People want to find new music that intrigues them and stands out without having to do deep searches for them.

Who is experiencing the problem?

All music listeners that spend a lot of time with music and need more enjoyable songs.

What is the problem?

The problem is that current music applications generalize genres together too much, thus making the same songs and styles become overplayed.

Where does the problem present itself?

This becomes apparent when people that often listen to music find themselves listening to the same songs on repeat and growing tired of it, whether it be at the gym, in an office, or at a party.

Why does it matter?

Music has numerous benefits apart from simple enjoyment that is crucial to be upheld as a staple to students, workers, and artists.
